Microsoft Bookings - setting up a shared calendar

Microsoft Bookings helps teams manage and streamline appointment scheduling. Follow the steps below to configure a shared calendar, enable availability across colleagues, and customize your booking preferences.

Step 1: Access Microsoft Bookings

1. Go to <https://outlook.office.com/bookings/> or open Microsoft Bookings via your Microsoft 365 portal
2. If this is your first time, select **Create a booking calendar** under **Shared booking pages**

Step 2: Set up business information

In the **Business Information** section, set up:

1. **Business name:** give your calendar a meaningful title (e.g., "Clarivate UX Research Bookings")
 2. **Business logo:** upload your organization or team logo
 3. **Business hours:** set default working hours. These can be overridden per staff or service
 4. **Business time zone:** To set up a time zone, go to **Booking Page** -> **Region & time zone settings** -> choose interviewer's current time zone. For Bookings to automatically adjust for the customer's time zone, keep unchecked "Always show time slots in business time zone".
5. **Hit save**

Tip: Choose a neutral or most commonly used time zone if your team is globally distributed

The screenshot displays two sections of the Clarivate interface. The top section, titled "Business information", contains three expandable panels: "Basic details" (highlighted with a red box), "Business logo" (highlighted with a red box), and "Business hours" (highlighted with a red box). The "Basic details" panel shows fields for business name, address, phone, and links. The "Business logo" panel shows the current logo and buttons for "Change logo" and "Delete logo". The "Business hours" panel is currently collapsed. The bottom section, titled "manage your booking page", contains five expandable panels: "Business page access control", "Customer data usage consent", "Default scheduling policy", "Customize your page", and "Region and time zone settings" (highlighted with a red box). The "Region and time zone settings" panel is expanded, showing a "Language" dropdown set to "English (United States)" and a "Current time zone" dropdown set to "(UTC+08:00) Beijing, Chong..." (highlighted with a red box). There is also an unchecked checkbox for "Always show time slots in business time zone".

Step 3: Add colleagues in Staff

1. Go to **Staff** in the left menu
2. Click **Add staff**
3. Enter your colleagues' names and email addresses
4. Set roles appropriately (admin/viewer/guest)
5. Click **save** after adding each staff member

The screenshot displays the Clarivate Bookings interface. On the left, a sidebar menu lists various options: Calendar, Booking page, Customers, **Staff** (highlighted with a red box), Services, Queue, Business information, and Integrations. The main content area is titled 'Bookings' and includes a 'Back to all booking pages' link. A red box highlights the '+ Add new staff' button. Below this is a search bar labeled 'Search Staff' and a dropdown menu for 'All roles'. The 'My profile' section shows the user's name, Minaxi Goel, and email address, MinaxiGoel@Clarivate.com, with an 'Administrator' role tag. The 'Other staff' section lists another user, Julia OKelley, also with an 'Administrator' role tag.

Step 4: Sync Outlook calendars for shared availability

1. To sync Outlook calendars: Go to **Edit staff** -> Check **Events on Office calendar affects availability**
 - This ensures only mutually available time slots are shown to customers
 - This reduces double bookings and helps coordinate availability across your team

Edit staff

✕

✉ MinaxiGoel@Clarivate.com ☎ Phone number

👤 **Administrator**
Administrators can edit all settings, add and remove staff, and create, edit and delete bookings. ▼

☒ Notify the staff member via email when a booking assigned to them is created or changed

Availability

☒ Events on Office calendar affect availability
Please note, personal calendar availability will not be accounted for in multi-day services.

☒ Use business hours
Turn off business hours to edit availability ▼

Discard **Save changes**

Step 5: Configure service (session) settings

1. Go to **Services** and click on **Add new service**

2. Add the following details:

- a. **Study title & description:** This would be shown to the customers upfront when they open the booking calendar

- b. **Session duration:** Choose the fixed time your session will last (e.g., 30 min, 60 min)
- c. **Buffer time:** Add buffer before and/or after appointments to prevent back-to-back bookings
Note: The meeting duration will be inclusive of the buffer time, so the participant will be given the time 5 mins later than the interviewer's scheduled time

d. Set email confirmation emails

All attendees (customer, staff and business)

Message

Hello there!

Greetings! Just a quick reminder that your **Clarivate Feedback Session** is scheduled to begin in **30 minutes**.

Your input is valuable and will help us improve our offerings. **Please join from a quiet place and ensure your audio/video is working.**

Looking forward to speaking with you soon!

f. **Set default scheduling policy:**

- **Time increments** will show next available slots at specified intervals
- **Minimum lead time** will allow customers to book/cancel until 'x' minutes prior to the session (setting to **0 hrs** will allow last minute cancellations if the customer is not able to make it)
- **Maximum lead time** will allow customers to book a session in 'n' days advance
- **Set email notifications**
- **Staff control: Deselect** 'Allow customers choose a specific person for the booking' if staff if you want all of your staff i.e. interviewers' to be attending the session for a service

Availability

In general, a service can be booked when its staff are free. If you wish to customize this further, you can do so below.

General availability:

Not bookable ▾

Availability during these dates: 🗑️

Start

23-Jul-25 📅

End (inclusive)

11-Aug-25 📅

Bookable when staff are free ▾

[⊕ Set different availability for a date range](#)

Step 6: Control staff visibility & booking rules

- In the **Service** settings, go to **Assign staff**
- Select **Assign all of your selected staff for an appointment** to show time common available time slots
- Deselect **Allow customers to see the names of the staff** if you don't want to disclose your names at the booking time

Edit service

Discard Save changes

Note: This ensures bookings only happen when **all selected team members** are available. It avoids customers picking just one.

Step 7: Final calendar sharing

1. Once your service and staff are configured, go to the **Booking page**
2. Publish the calendar and share the booking link with your users
3. Test the calendar to ensure correct availability is showing

Optional checks before launch

1. Test different time zones (e.g., from India and US) to ensure proper conversions
2. Test double bookings and overlapping meetings
3. Review reminder emails for accuracy
4. For issues or customizations, contact your Microsoft 365 admin or refer to the [Microsoft Bookings Support Page](#)
